DIRECTIONS

Add Hybrid Bloom to the spray tank when half full. Agitation in the tank will enhance the speed of solubility. Allow extra time for higher rates and areas with extremely cold water to completely solubilize before spraying.

Foliar Application Rates:

Apply liberally to plant foliage every 7 - 10 days
1 teaspoon per gallon - Small scale
5lbs per 1000 gallons - Large scale

Hydroponic/Soil Root Drench Application Rates:

Mild rate: 1 teaspoon per gallon = approx. 300 ppm (0.5 scale)
Moderate rate: 2 teaspoons per gallon = approx. 600 ppm (0.5 scale)
Aggressive rate: 3 teaspoons per gallon = approx. 900 ppm (0.5 scale)
Max recommended rate: 4 teaspoons per gallon = approx. 1200 ppm (0.5 scale)
